

Experiment – 4 : Data Modelling and Form Design

Aim

To design and develop an **Event Registration Form** using **Zoho Creator** by creating a structured form, applying suitable validations, and generating a report for managing event participants.

Theory

Data modelling and form design involve organizing information into suitable fields and sections for efficient data collection and management. In Zoho Creator, different field types can be used to collect and validate participant information.

In this experiment, an **Event_Registration_Form** is designed to collect participant details, contact and institution information, event preferences, scheduling details, areas of interest, and acknowledgement of the event code of conduct. The form is divided into four sections: **Participant Details, Contact & Institution Details, Event Preferences, and Scheduling & Acknowledgement**.

Validation rules are applied to ensure accurate data entry, including mandatory fields, valid email and phone formats, team size between 1 and 6 members, valid session dates, and compulsory acceptance of the code of conduct. The submitted data is displayed in the **Event_Registration_Report** for participant management.

Procedure

1. Open **Zoho Creator** and create the **Event Registration & Participant Management** application.
2. Create the **Event_Registration_Form**.
3. Add the required fields for participant, contact, institution, event preference, scheduling, and acknowledgement details.
4. Organize the fields into the four specified sections.
5. Configure the required validations and mandatory fields.
6. Save and preview the form.
7. Enter sample participant details and submit the form.
8. Create the **Event_Registration_Report** and verify the submitted records.
9. Filter the records based on **Event Track** and **Preferred Session Slot** for event management.

Result

The **Event Registration Form** was successfully created in **Zoho Creator** with a structured data model, appropriate validations, and organized sections. Participant records were successfully submitted and displayed in the **Event_Registration_Report**, enabling efficient participant verification and event management.
